

별표 2

활주로 침범예방 및 지상운용을 위한 표준운영절차 표본 (Standard Operating Procedures(SOP) Template for Ground Operations and the Prevention of Runway Incursions)

이 표본은 항공사가 활주로 침범의 예방을 위한 표준운영절차(SOP)의 목차를 개발하는 데 유용하게 사용할 수 있다.

1. Captain's authority
2. Use of automation
 - 2.1 The operator's automation philosophy
 - 2.2 Specific guidance in selection of appropriate levels of automation
 - 2.3 Autopilot/flight director mode control inputs
 - 2.4 Monitoring of automated systems and Flight Mode Annunciator
 - 2.5 Flight Management System inputs
3. Checklist philosophy
 - 3.1 Policies and procedures(who calls for, who reads, who does)
 - 3.2 Format and terminology
 - 3.3 Type of checklist
 - Challenge-Do-Verify
 - Do-Verify
 - 3.4 Walk-around
4. Checklist
 - 4.1 Safety check – power on
 - 4.2 Originating/receiving
 - 4.3 Before start
 - 4.4 After start
 - 4.5 Before takeoff
 - 4.6 Preliminary landing

4.7 Landing

4.8 After landing

4.9 Parking and securing

4.10 Emergency procedures

4.11 Non-normal/abnormal procedures

5. Communications

5.1 Who handles radios

5.2 Primary language used

5.3 Air Traffic Control(ATC)

5.4 On the Flight deck

5.5 Keeping both pilots in the loop

5.6 Company radio procedures

5.7 Flight deck to cabin signals

5.8 Passenger briefing

5.9 Cabin to Flight deck signals

5.10 Procedure to review/cross check clearances

- Cross or hold short of a runway
- Taxi into position and hold
- Takeoff
- Land

6. Briefings

6.1 Controlled Flight Into Terrain(CFIT) risk consideration

6.2 Special airport qualifications

6.3 Special security considerations

6.4 Temperature considerations

6.5 Before taxi

6.6 Before takeoff

6.7 Descent/approach/missed approach(approach briefing generally done prior to beginning of descent)

7. Flight deck access

7.1 On ground/in-flight

7.2 Jump seat

7.3 Access signals, keys

8. Flight deck discipline

8.1 Sterile cockpit in-flight and on the ground

8.2 Monitoring/cross checking

8.3 Maintaining outside vigilance

8.4 Transfer of control

8.5 Additional duties

8.6 Flight kits

8.7 Special security equipment

8.8 Headsets/speakers

8.9 Boom mikes/handsets

8.10 Maps/approach charts

8.11 Meals

9. Boarding passengers/cargo

9.1 Special security considerations

9.2 Carry-on baggage

9.3 Exit row seating

9.4 Hazardous materials

9.5 Prisoners/escorted persons

9.6 Guns onboard

9.7 Count/load

10. Push back/power back

11. Taxiing

11.1 Single engine

11.2 All engines

11.3 Contaminated Runways

- Ice
- Snow
- Water
- Slush

11.4 Prevention of runway incursions [별표4]

- Use of airport diagram
- Crew confirmation of taxi clearance
- Visually clear final approach path and the runway before crossing or taking any active runway
- Complex intersections, airfield construction, and "hot spots"

12. Crew Resource Management (CRM)

12.1 Crew briefings

- Flight attendants
- Flight crew

13. Weight and balance/cargo loading

13.1 Who is responsible for loading cargo, and securing cargo

13.2 Who prepares the weight and balance data form; who checks it

13.3 Copy to crew

14. Flight deck/cabin crew coordination

14.1 Boarding

14.2 Ready to taxi

14.3 Cabin emergency

14.4 Prior to takeoff/landing

15. Approach philosophy

15.1 Monitoring during approach

15.2 Precision approaches preferred

15.3 Stabilized approaches standard

15.4 Use of navigation aids

15.5 FMS/autopilot

15.6 Use, and when to discontinue use

15.7 Approach gates

15.8 Limits for stabilized approaches

15.9 Use of radio altimeter

15.10 Briefing for expected runway prior to beginning approach

15.11 Go-arounds

- Plan to go around
- Change plan to land when visual, if stabilized

16. Individual approach type

16.1 All types, including engine-out

17. For each approach

17.1 Profile

17.2 Flap/gear extension

17.3 Call outs

17.4 Procedures

18. Go-around/missed approach

18.1 When stabilized approach gates are missed

18.2 Procedure

18.3 Call outs

18.4 Clean-up profile

19. Landing

19.1 Actions and call outs

19.2 Configuration for conditions

- Visual approach
- Low visibility
- Contaminated runway
- Close-in turns

19.3 Cross wind

19.4 Rejected

19.5 Transfer of control after first officer landing

19.6 Anticipated landing runway and taxiway exit designation & direction of turn to the first hold short point
