Test Result Values (IU/mL)				References				
Nil	TB1 Ag	TB2 Ag	Mitogen	Nil	TB1Ag-Nil	TB2Ag-Nil	Mitogen-Nil	Result
				≤ 8.0	< 0.35		≥ 0.5	Negative
					≥0.35 and < 25% of Nil value			
					≥ 0.35 and ≥ 25% of Nil	Any	Any	Positive
					Any	≥ 0.35 and ≥ 25% of Nil		
					< 0.35		< 0.5	Indeterminate
					≥ 0.35 and < 25% of Nil value			
				> 8.0	Any		Any	

- * The result of the MMA latent tuberculosis test is assayed using IGRA (interferon-gamma release assay).
- * The result of the latent tuberculosis test shows that no interferon-gamma reaction against TB-specific antigen was observed and infers that the person is unlikely to have tuberculosis.
- * However, please note that this test does not completely exclude the possibility of a tuberculosis infection.
