Observe the Regulations on Visiting Biological Collection Rooms and Examining Specimens

Regulation for Visitors of the Biological Collections

1. Anyone wishing to examine the collections should first contact one of the staff members prior to your visit.
2. Opening hours are 9:30 to 17:00 on Monday to Friday except weekends and national holidays.
3. Smoking and use of naked flames in any part of biological collections building is strictly prohibited. Please get out through emergency exits in case of a fire or other emergency.
4. Watch out for personal belongings.
5. The biological collection rooms is a working place for the biological collections staffs as well as visitors. Loud chatting is not allowed in the biological collection rooms, please find somewhere outside the main part in order not to disturb others in the area.
6. Sign the visitor's book everytime you come to the specimens rooms.
7. Do not bring accompanies (family or friends)
8. No food or drink is allowed in the building.
9. Use electronic devices (computer etc.) under supervision of KH's staff members.
10. Every specimen should be frozen before entering into the biological collection rooms.

Conditions for examining the Biological Collections

1. Every visitor should be informed about handling specimens before examining them. Specimens should always be handled with extreme care.
2. Extracting samples from specimens or bringing out specimens from the biological collection rooms may be allowed only if permission is granted by the director of the division, in compliance with the policy on maintaining of biological specimens.
3. Never turn the specimens as though they were the pages of a book (any loose fragments fall off if the sheets are placed face down). If you wish to look through a folder, put it flat on the table and stack the specimens neatly to one side, always keeping them horizontal. Please keep the specimens covering with the folders when you take a break.
4. We encourage visitors to annotate on the specimens. The annotated label should include the name of the investigator, investigated date, and the professional opinion. Old determination labels must never be removed. If you want attach your own annotation labels, please use the glue being used in our division.
5. If you want to loan the specimens for your study, you should be advised by a staff member of our division (forms for this purpose will be provided). A formal application for the loan must be sent from the director of your institute.
6. It is not advisable to dissect the type or historically important specimens without permission from our division. The preparations produced from the dissection have to be placed in a small packet and attach on the mounting paper. And the preparations should belong to our division and should not be taken out.
7. **[Extracting samples]** Anatomy, pollen, and phytochemistry samples from our biological specimens should be undertaken with permission by director of our division. And the sampling

for extracting DNA from our biological specimens is not permitted.

8. **[Taking photographs]** Taking photographs of the specimens should be undertaken with director's permission of our division. And the photos should only be used in research data. If you want to publish the photo, you should get the permission of our division again.
9. Please do not hesitate to contact our staff members, if you feel necessary of any kind of our help during your stay in our division.
